General Area or Research Direction

(Keywords or a short description is sufficient.) This is not a thesis proposal, but only serves to identify the student's research supervisor.

Students in the first year who are serving as TAs or receiving Fellowships, and are so far unable to identify a thesis supervisor and research project, should register for three units of Subject 6.9932 (Intro to Research Electrical Engineering and Computer Science) as a supplement to classroom subjects. Enrolling in 6.9932 is to assist students in the research supervisor selection process and to begin their thesis research.
